PRECISION MACHINED & FABRICATED PARTS

SETCO MANUFACTURING & SOURCING CAPABILITIES

Setco is a leading global precision parts manufacturer with complete manufacturing facilities located in Cincinnati - Ohio USA, Taichung-Taiwan, and Pune – India. Additionally, Setco has nine Service Center locations around the world where we repair spindles, stock new spindles and warehouse a wide variety of fabricated and machined precision parts. In business now for over a hundred years, Setco has the experience and expertise to be your valued partner and supplier of precision parts.

Setco tailors our services to meet your exact needs. If you have special requirements for inspection, packaging, shipping, stocking, blanket order, or anything else we will develop a program that works for your business.

Our Capabilities

Setco has three manufacturing facilities, and an extensive supply chain to source virtually any type of part that you require. Whether your part is machined from raw material, casted, welded, forged, or fabricated by any other process we can produce it to your requirements, holding ground tolerances to micron precision.

Our Process

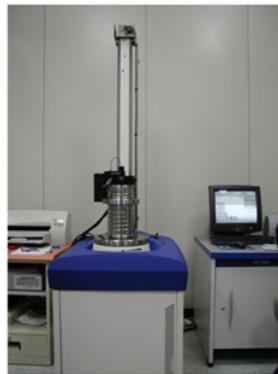

Our process is simple and fast. Send us your part drawing, the quantity you require, and the lead time and we'll take it from there. Our Engineering team will perform a complete drawing review, including dimensional specifications, material selection, hardness, surface treatment/coatings, part marking, or any other requirements that may be needed.

Our Quality

Setco is ISO 9001:2015 certified, and we hold our precision parts to the highest quality standards. We certify your parts using some of the highest quality inspection equipment available, including Zeiss CMM and Taylor Hobson roundness and cylindricity measuring machine.

Zeiss Coordinate Measuring Machine

Taylor Hobson Roundness & Concentricity Measuring Machine

Setco is the technical leader in the design, manufacture, and service of precision spindles, milling heads, slides, and spindle/slide combinations. With the largest variety of spindles, new and rebuilt, including belt-driven, geared, motorized, high-speed and high-frequency models, Setco is a major spindle manufacturer. Through its nine global locations, Setco is the industry forerunner in the repair and servicing of spindles for over 350 machine tool brands.
